

10 x 10' booth space—2 booths wide

Chairs

NOTE:

It might be worthwhile adding a third table (maybe 4' in size) in an "L" on the right side of the booth. This would allow for some more "spacing" of display materials. You could also use it as a sign-in table.

LEFT TABLE:

MultiSubject Display—Rack on the far left of the table with the rest of the display on book easels.

Core Sample/IG Display—Large rack that straddles both tables. May hold an entire Core, or samples of various Cores with front-facing Core IGs.

RIGHT TABLE:

LA/Handwriting Display—Basket with K-2 Adv Reader samples. Small crate with LA IGs and hand-writing samples behind.

Electives/Science/Math Display—Large rack or book shelves holding samples and Science IGs.
